PRODUCTS

BIVALIRUDIN, (CAS no 128270-60-0), with leading brand such as Angiomax (The Medicines Company) is a specific and reversible Direct Thrombin Inhibitor (DTI) which overcomes limitations faced by Indirect Thrombin Inhibitors such as Heparin. It is indicated for use as an anticoagulant in patients undergoing Percutaneous Transluminal Coronary Angioplasty (PTCA) or Percutaneous Coronary Intervention (PCI).

BUSERELIN, (CAS no 57982-77-1), with leading brand such as Suprefact (Sanofi Aventis), is a GnRH analogue used in the treatment of hormone dependent Prostate Cancer, Breast cancer, Endometriosis and Assisted reproduction.

CALCITONIN, (CAS no 47931-85-1), with leading brand such as Miacalcin (Novartis) as a both Nasal spray & injection, is a 32 amino acid linear polypeptide hormone produced in humans. It is used in the treatment of Osteoporosis.

CARBETOCIN, (CAS no 37025-55-1), with leading brand such as Duratocin (Ferring) is an obstetric drug used to control Postpartum hemorrhage, Bleeding after giving birth. It is an analogue of Oxytocin.

CETRORELIX, (CAS no 120287-85-6), with leading brand such as Cetroride (EMD Serono) is a synthetic decapeptide, used to treat hormone sensitive cancers of the Prostate and Breast (in pre-menopausal women), Gynaecological disorders (such as Endometriosis, Uterine fibroids and Endometrial thinning) and in Assisted reproduction to inhibit premature luteinizing hormone surges.

DESMOPRESSIN, (CAS no 16679-58-6), with leading brand such as Minirin (Ferring) is a Vasopressin analogue used in the treatment of Nocturnal Enuresis (Bed Wetting) in children and adults and in the treatment of Diabetes Insipidus.

GONADORELIN, (CAS no 71447-49-9), with leading brand such as Factrel (Fort Dodge), is used in Human and Veterinary field.

GOSERELIN, (CAS no 65807-02-5), with leading brand such as Zoladex (AstraZeneca) is used in treatment of hormone-sensitive cancers of the breast (in pre- and peri-menopausal women), prostate and gynaecological disorders (endometriosis, uterine fibroids and endometrial thinning). In addition, goserelin is used in assisted reproduction and in the treatment of precocious puberty.

LEUPROLIDE, (CAS no 74381-53-6), with leading brand such as Elligard (Sanofi Aventis) is a GnRH analogue used in the treatment of Prostatic Cancer, Breast Cancer, Endometriosis, Precocious puberty and other related conditions.

OCTREOTIDE, (CAS no 83150-76-9), with leading brand such as Sandostatin (Novartis) is used for the treatment of Acromegaly, Diarrhea and Flushing episodes associated with carcinoid syndrome and treatment of Diarrhea in patients with Vasoactive Intestinal Peptide secreting tumors (VIPomas).

OXYTOCIN, (CAS no 50-56-6), with leading brand such as Pitocin (Pfizer) is used in the late stage of pregnancy to induce labor. It is also used to induce labor in pregnancies at risk (Pre-eclampsia, Eclampsia & Diabetes).

SOMATOSTATIN, (CAS no 38916-34-6), with leading brand such as Stilamin (Merck Serono) is used in the treatment of Giantism (excessive secretion of Growth Hormone) and Acromegaly (a hormonal disorder most commonly occurring in middle aged men and women).

TERLIPRESSIN, (CAS no 14636-12-5), with leading brand such as Glypressin (Ferring) is used in the treatment of norepinephrine resistant septic shock, Hepatorenal syndrome (which causes rapid deterioration in kidney function) and Esophageal varices.

TETRACOSACTIDE, (CAS no 16960-16-0), with leading brand such as Synacthem (Novartis) is a synthetic peptide corresponding to the first 24 amino acids of adrenocorticotrophic hormone (ACTH). The naturally occurring hormone consists of 39 amino acids and is synthesized and released from the anterior pituitary in response to the hypothalamic hormones corticotropin-releasing hormone (CRH) and arginine vasopressin (AVP). ACTH acts through G protein-coupled receptors on the adrenal glands and stimulates the secretion of glucocorticoids (mainly cortisol in human) and mineralocorticoids, and to lesser extent androgens. Circulating glucocorticoid levels regulate in turn the release of CRH/AVP and ACTH by negative feedback control. Tetracosactide, which is less immunogenic and has a shorter plasma half-life than the full-length hormone, is used as a diagnostic agent for testing adrenal function and is indicated for the treatment of rheumatic diseases, skin diseases, ulcerative colitis, multiple sclerosis, and childhood epilepsies. In cancer patients undergoing chemotherapy it finds application as an anti-emetic agent.

TRIPTORELIN, (CAS no 57773-63-4), with leading brand such as Decapeptyl (Ferring) is a GnRH agonist, which is used in the treatment of hormone responsive cancers like Prostate Cancer and Breast Cancer and in the treatment of Endometriosis, Uterine Fibroids, Precocious Puberty and Assisted Reproduction.
